UPLOADED PHOTO SNAPSHOT

Baseline Input

Uploaded input photo only.

Recommendation visuals start after this baseline page.

● VISIBLE READ

Oval-leaning face, soft rectangular jaw influence

● HAIR READ

Medium density, straight-to-slight-wave, front lift

BASELINE USE

This page anchors the face shape, hair density, front lift, and growth-direction read before any recommendation image is introduced.

EXECUTIVE STYLE SUMMARY

BEST CUT

Textured Crop + Low Taper

Clean, compact, camera-friendly. Strong enough for work photos, soft enough for daily casual.

92

FACE FIT

Low

BARBER RISK

Med

EFFORT

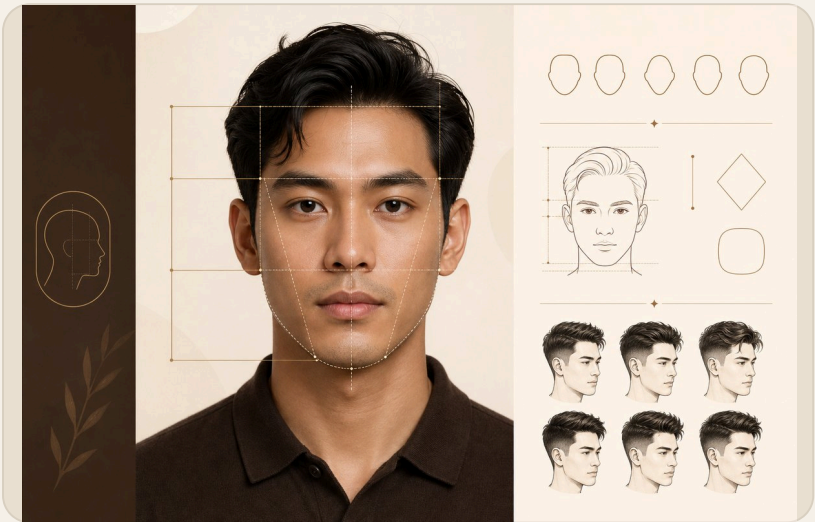

● AVOID

Heavy middle-part volume, wet slick-back shine

FACE SHAPE & BALANCE MAP

Face Shape & Balance Map

- JAW
Soft rectangular
- LENGTH
Oval leaning
- GOAL
Do not add temple width

SILHOUETTE

Compact sides,
light vertical
top texture.

HAIR TYPE & GROWTH BEHAVIOR

Hair Type & Growth Behavior

"The haircut should follow natural growth direction instead of forcing a style that collapses after one hour."

DENSITY
Medium

TEXTURE
Straight / slight wave

FRONT LIFT
Natural

HOLD
Matte clay

PRIMARY HAIRCUT RECOMMENDATION

Primary Haircut Recommendation

FRONT VIEW

BACK VIEW

SIDE PROFILE

BARBER WORDING

Textured crop, low taper, top 5–7 cm, broken texture, matte finish.

WHY IT WORKS

Sharpens the frame, controls side width, keeps movement natural, and does not over-style the face.

- TOP
5–7 cm, broken texture
- SIDE
Low taper around ear
- BACK
Natural neckline, not boxed hard
- FINISH
Matte, not wet

SIDE PROFILE & TAPER GUIDE

Side Profile & Taper Guide

Keep the taper low.

*Do not disconnect the side wall from the top.
The fade should support the haircut, not become the haircut.*

- TAPER POINT

Near ear, gradual transition

- TEMPLE

Compact but not shaved too high

- NECKLINE

Natural, not boxed too aggressively

OUTFIT & ACTIVITY FIT

Outfit & Activity Fit

WORK / OFFICE

Crisp shirt + clean collar

Controlled hair volume. Forehead open, sides compact.

LINKEDIN / CLIENT

Blazer or structured overshirt

Matte finish. Studio-style light. Camera-ready.

WEEKEND / CAFE

Relaxed overshirt, no wet shine

Natural texture. Slightly undone but still clean.

AVOID Busy neckline + heavy fringe — makes the look compete with the face instead of framing it.

STYLES TO AVOID

Styles to Avoid

Heavy middle part

Blunt mushroom fringe

High disconnected undercut

The report should say no clearly. Trust goes up when bad-fit options are filtered out.

✓ Better: soft textured crop + low taper

SHOW THIS TO YOUR BARBER

I want a textured crop with a low taper.

Keep the top 5–7 cm, add broken texture, avoid blunt fringe, and finish matte.

✓ DO

- Low taper, near the ear
- Natural neckline, not boxed hard
- Compact temple, gradual transition
- Matte finish — no gel, no shine

✗ DO NOT

- ✗ High fade or disconnected undercut
- ✗ Wet slick-back finish
- ✗ Blunt or heavy fringe
- ✗ Shave temple too high

Face Fit Score

This cut is calibrated specifically for this face shape and hair behavior.

PHOTO ANGLE RECOMMENDATION

How to Photo This Haircut

Each angle reveals a different strength of this cut. Use these as references for selfies, LinkedIn, or content.

SELFIE / HP

Arm's Length, Slightly Above

Hold phone slightly above eye level, tilt chin down. Shows texture and fringe naturally. Best for casual posts and stories.

STUDIO / PROFESSIONAL

Eye-Level, Direct Front

Neutral background, soft box light. Chin level, shoulders squared. This is the LinkedIn shot — clean, confident, no distractions.

STREET / CANDID

¾ Front, Natural Light

Turn body 45° from camera. Shows taper depth and side wall cleanly. Natural outdoor light adds dimension to the texture on top.

SIDE PROFILE

Pure Side, 90° Angle

Shows the taper line and neckline shape. Best angle to verify low taper execution after leaving the barber. Also flatters the jaw.

STYLING ROUTINE & PRODUCTS

Styling Routine & Products

01

Towel Dry

Leave slight moisture. Do not blow on completely dry hair.

02

Blow Dry

Forward then up for natural lift. Medium heat, 60 seconds.

03

Matte Clay

Pea-sized amount only. Warm between palms first.

04

Finger Texture

Break the top. No comb lines. Tousle forward lightly.

7m

Total daily routine.
Low effort, consistent results every morning.

● PRO TIP

Use less clay than you think. Start pea-sized, warm it between palms, then add only if the top still collapses after 60 seconds.

MAINTENANCE TIMELINE

Maintenance Timeline

 Book taper cleanup every 3–4 weeks

Best photo window

Week 2–3: the cut has settled but the taper still reads clean on camera.

Cleanup trigger

Book when side bulk starts rounding the temple or neckline loses shape.

The goal is repeatability: photo-ready shape for work/client weeks, then a planned taper cleanup before the haircut turns bulky.

REFERENCE DIRECTION BOARD

Reference Direction Board

REFERENCE RULE

Use as direction,
not exact copies.

- TEXTURE DIRECTION
Clean Korean texture: soft movement, no hard spikes, no wet shine.
- SHAPE LANGUAGE
Modern textured crop: compact top silhouette with broken front texture.
- FADE BOUNDARY
Soft low taper: transition stays near the ear, not high/disconnected.
- FRINGE RULE
Natural fringe: light forward fall, not blunt mushroom weight.

FINAL ACTION PLAN

Final Action Plan

YOUR NEXT CUT

Textured crop, low taper, broken top texture, natural matte styling.
